

A Train the Trainer Program

A CLASS ABOUT WASTE TIRE FIRES AND STORAGE REGULATIONS

All participants receive:

1. Instructor guide
2. Student Handout
3. Student Text
4. Media Kit
5. FSTEP Certificate

COURSE CONTENT

1. Introduction – Defining the Problem
2. Tire History
3. Tire Markets
4. Tire Storage
5. Sources of Ignition
6. Codes and Regulations
7. Ground Rubber
8. Preplanning
9. Fire Behavior
10. Hazmat Response

INSTRUCTOR

Rodney Slaughter

Rodney has 30 years of fire service experience including writing the first “Rings of Fire” training program in 1993. He is a recognized expert on the subject of outdoor scrap tire storage, and is a featured speaker for regional EPA conferences and training classes throughout California. Rodney has been instrumental in the continuing development of codes and regulations at the state and national level.

RINGS OF FIRE

TIRE FIRE PREVENTION AND SUPPRESSION

TIRE FIRE PREVENTION AND SUPPRESSION

DID YOU KNOW?

California generates 33 million scrap tires every year. Where do these waste tires go? What impact would a large waste tire pile have on your department's resources? This training program updates the first tire fire-training program produced by the Office of the State Fire Marshal. The new interactive program includes information on waste tire history, industry practices, environmental impacts, fire prevention and code development, pre-fire planning, fire suppression, firefighter safety, and post-fire remediation. An emphasis will be placed on unified enforcement & command.

PROGRAM GOAL

To provide fire professionals and enforcement officers, along with waste tire owners and operators, up to date information so they can make informed decisions about allocating resources related to outdoor storage of tires.

FSTEP CERTIFICATION

This class is Fire Safety Training and Education Program (FSTEP) certified, which means that personnel who attend will receive an FSTEP certificate. This certificate costs five dollars and will be combined with a \$25 materials reproduction fee for a total of \$30 per attendee.

Individuals who meet FSTEP training prerequisites are encouraged to teach this class
